Education

Meerut Institute of Engineering and Technology	2021-25

BTech | CSE- IOT

Technical Skills

- Language: Java, Python, JavaScript, HTML5, CSS
- Databases: MongoDB, My SQL
- Version Control: Git, GitHub
- Cloud Platform: Aws
- Operating System: Linux

And other DevOps tools and OOPs.

Projects

- **AI-Powered Code Reviewer**

  An AI-driven tool for automated code analysis and improvement suggestions.
  Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), OpenAI API

  Key Features:

  ▪ AI Powered code review and suggestions.
  ▪ Detects syntax errors, performance issues, and best practices violations.
  ▪ Provides real-time feedback for code improvement.
  ▪ Full-stack development with AI integration

  Conclusion: - Enhanced development efficiency by automating the code review process, reducing manual effort and improving code quality.

- **Employee Management System (EMS)**

  Developed a full-stack employee management system using MERN stack and Vite for fast development.
  - o Implemented user authentication, CRUD operations for employees, and role-based access control to enhance security.
  - o Designed a responsive and intuitive UI with Tailwind CSS and integrated Redux for efficient state management.

Training

AWS Cloud		Complete DevOps Specialization

Soft Skill:- Communication | Team Work | Adaptability | Problem-Solving
